

3 Things to Protect Your Data Layer

From the Data Security Experts at

SOARING EAGLE
DATABASE CONSULTING

Backup Everything

And we mean EVERYTHING

01 

The Database

02 

Application Code

03 

PEOPLE!- Especially those with
DR and Restore capabilities

Roles and Rules

This one can be hard if you dont have experiance...

Limited Access to Prod Servers

ONLY the most trust and reliable

No Changes without Q/A procedures

Every, Single, Time

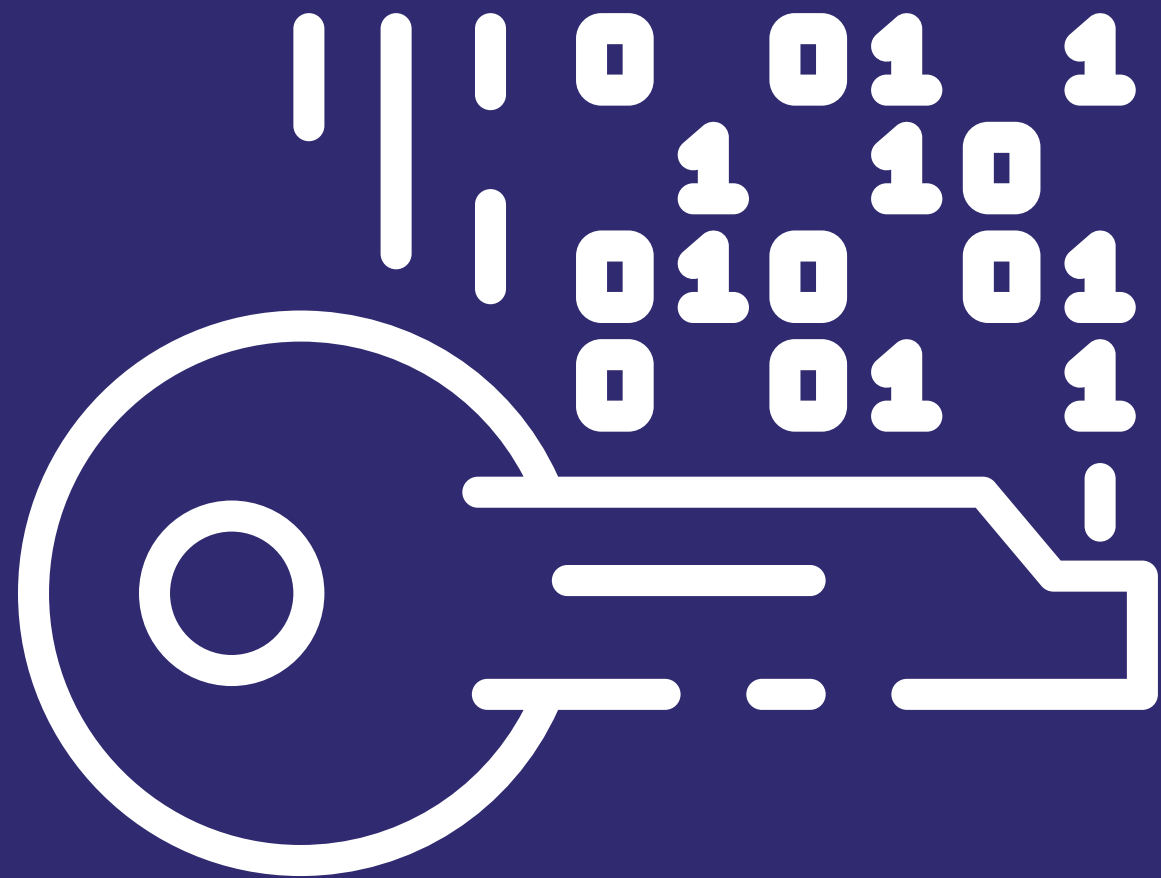

Buy Audit Software

And make sure a TEAM responds to alerts

Encryption

At Hardware Level

At Rest

Store Keys **OUTSIDE**
the Environment

Our Data Security Reviews take the stress out of Data Management

Need more help setting best practices in your
Data Center? Contact **Soaring Eagle** today
